Migrant Health Guide

The Migrant Health Guide is a free online resource that aims to assist primary health care practitioners who look after people who have come to live in the UK from abroad. The guide is organised on a country specific basis and outlines a range of health issues that might affect someone coming from each country, making their health care needs different to that of the UK born population. It also provides practical guidance and resources to assess and manage a wide range of health needs. The guide has been developed in consultation with users and is endorsed by both the Royal College of General Practitioners and the Royal College of Nursing.
