

RSC Communicable and Respiratory Disease Report for England

Key Statistics:

Week Number/Year.....	35/2024
Week Starting - Ending.....	26/08/2024 - 01/09/2024
No. of Practices.....	1,650
Population.....	17,201,146

National (England)

- **Acute Respiratory Infections:** decreased from **127.6** in week 34 to **114.9** in week 35.
- **Influenza-like illness:** decreased from **1.1** in week 34 to **0.9** in week 35.
- **Exacerbations of Chronic Lung Disease:** decreased from **10.4** in week 34 to **10.0** in week 35.
- **Lower Respiratory Tract Infections:** decreased from **44.4** in week 34 to **40.3** in week 35.
- **Upper Respiratory Tract Infections:** decreased from **75.5** in week 34 to **66.9** in week 35.
- **COVID-19:** decreased from **3.1** in week 34 to **3.0** in week 35.

Regional (North, South, London and Midlands and East)

- **Acute Respiratory Infections:** decreased from **95.1** in week 34 to **86.7** in week 35 in the London region, decreased from **160.3** in week 34 to **145.6** in week 35 in the North region, decreased from **118.3** in week 34 to **105.2** in week 35 in the South region, and decreased from **134.5** in week 34 to **120.7** in week 35 in the Midlands And East region.
- **Influenza-like illness:** decreased from **1.3** in week 34 to **1.0** in week 35 in the London region, was unchanged at **1.2** in week 34 and **1.2** in week 35 in the North region, decreased from **1.1** in week 34 to **0.9** in week 35 in the South region, and decreased from **0.6** in week 34 to **0.5** in week 35 in the Midlands And East region.
- **Exacerbations of Chronic Lung Disease:** was unchanged at **5.8** in week 34 and **5.8** in week 35 in the London region, decreased from **14.9** in week 34 to **14.7** in week 35 in the North region, decreased from **9.1** in week 34 to **8.8** in week 35 in the South region, and decreased from **11.4** in week 34 to **10.5** in week 35 in the Midlands And East region.
- **Lower Respiratory Tract Infections:** decreased from **26.9** in week 34 to **22.3** in week 35 in the London region, decreased from **61.2** in week 34 to **55.6** in week 35 in the North region, decreased from **40.8** in week 34 to **37.5** in week 35 in the South region, and decreased from **46.9** in week 34 to **43.8** in week 35 in the Midlands And East region.
- **Upper Respiratory Tract Infections:** decreased from **62.0** in week 34 to **58.3** in week 35 in the London region, decreased from **89.2** in week 34 to **79.3** in week 35 in the North region, decreased from **70.8** in week 34 to **61.1** in week 35 in the South region, and decreased from **79.4** in week 34 to **69.6** in week 35 in the Midlands And East region.
- **COVID-19:** increased from **2.4** in week 34 to **2.5** in week 35 in the London region, decreased from **3.2** in week 34 to **3.1** in week 35 in the North region, decreased from **3.7** in week 34 to **3.4** in week 35 in the South region, and increased from **2.7** in week 34 to **3.0** in week 35 in the Midlands And East region.

Comment:

Overall rates of acute respiratory infections (ARI) have decreased in all regions and are below the seasonal average (page 6). Rates of influenza-like illness (ILI) (page 2 and 3) have decreased in most regions and are around the seasonal average, while the overall rate of COVID-19 (page 5) has decreased slightly, with minor variations by region and age band.

Hay fever/allergic rhinitis (page 13) and measles and whooping cough (page 14) are above their seasonal averages. Rates also remain above the seasonal average for scabies (page 15).

This report includes a respiratory virology update. SARS-CoV-2, is the predominant circulating virus detected by the UK Health Security Agency (UKHSA) Reference Virology Lab. Rates presented in this report are the number of new cases per 100,000 people by condition and region, with age-band also reported for acute respiratory infections (pages 3 to 11).

2024 Focus

Please see page 19 for explanatory notes on the data.

(A) Influenza-like illness: national incidence rate 2024 by region

(B) RCGP/UKHSA Influenza Virology Swab Surveillance 2024

(C) RCGP/UKHSA RSV, Influenza and SARS-CoV-2 Virology Swab Surveillance 2024 by viral strain

The weekly virology samples displayed are offset from the ISO Week (Graph C).
 *No specified subtype, or coinfection with H1N1 and H3N2.

(D) Influenza-like illness: national incidence rate 2024 by age band

(E) Influenza-like illness: national incidence rate 2024 by age band

This table shows the level of intensity of ILI by age band. MEM thresholds have been calculated separately for each age band - the ranges are shown in the table Threshold levels by age band.

Table 1	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

(F) Acute Bronchitis and Bronchiolitis: national incidence rate 2024 by age band

Weekly Influenza-like illness and Acute Bronchitis and Bronchiolitis incidence rates per 100,000 persons

	Influenza-like illness	Acute Bronchitis and Bronchiolitis		Influenza-like illness	Acute Bronchitis and Bronchiolitis
<1yr	0.7	43.6	London	1.0	0.7
1-4yrs	0.6	3.2	North	1.2	1.8
5-14yrs	0.2	0.3	South	0.9	1.1
15-24yrs	0.8	0.4	Midlands And East	0.5	1.4
25-44yrs	1.1	0.6	National	0.9	1.3
45-64yrs	1.0	1.0			
65-74yrs	0.9	1.4			
75-84yrs	0.9	1.3			
85+yrs	0.9	1.9			
All ages	0.9	1.3			

**The <1yr age band is not presented (Graph F).

(G) COVID-19: national incidence rate 2024 by region

(H) COVID-19: national incidence rate 2024 by age band

1. Respiratory Infections

(I) Acute Respiratory Infections (ARI): national incidence rate 2024 by region

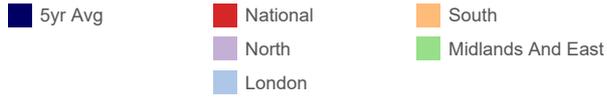

(J) Acute Respiratory Infections (ARI): national incidence rate 2024 by age band

1. Respiratory Infections - by region

1. Respiratory Infections - by age band

Influenza-like illness (ILI)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Influenza-like illness (ILI)
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Exacerbations of Chronic Lung Disease (ECLD)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Exacerbations of Chronic Lung Disease (ECLD)
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI)
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

1. Respiratory Infections - by region

1. Respiratory Infections - by age band

Upper Respiratory Tract Infections (URTI)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI)
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Exacerbations of Chronic Lung Disease (ECLD) - Asthma Exacerbations
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Exacerbations of Chronic Lung Disease (ECLD) - Asthma Exacerbations
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Exacerbations of Chronic Lung Disease (ECLD) - COPD Exacerbations
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Exacerbations of Chronic Lung Disease (ECLD) - COPD Exacerbations
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

1. Respiratory Infections - by region

1. Respiratory Infections - by age band

Lower Respiratory Tract Infections (LRTI) - Pneumonia
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI) - Pneumonia
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI) - Acute Bronchitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI) - Acute Bronchitis
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI) - Bronchiolitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Lower Respiratory Tract Infections (LRTI) - Bronchiolitis
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

1. Respiratory Infections - by region

1. Respiratory Infections - by age band

Upper Respiratory Tract Infections (URTI) - Croup
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Croup
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Tonsillitis/Pharyngitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Tonsillitis/Pharyngitis
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Otitis Media
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Otitis Media
Weekly incidence (per 100,000 all regions) by age band for 2024 compared with 5 year average

1. Respiratory Infections - by region

1. Respiratory Infections - by age band

Upper Respiratory Tract Infections (URTI) - Sinusitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Sinusitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Laryngitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Upper Respiratory Tract Infections (URTI) - Laryngitis
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

2. Water & Food Borne Disorders

5yr Avg National North London South Midlands And East

Infectious Intestinal Disease (ICD10: A00-A09)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Infectious Intestinal Disease (ICD10: A00-A09)
Weekly incidence (per 100,000 0-4 years) by region for 2024 compared with 5 year average

Non-Infective Enteritis & Colitis (ICD10: K50-K52)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Viral Hepatitis (ICD10: B15-B19)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

3. Environmentally Sensitive Disorders

5yr Avg National North London South Midlands And East

Asthma (ICD10: J45-J46)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Disorders of Conjunctiva (ICD10: H10-H13)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Hayfever/Allergic Rhinitis (ICD10: J30)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

4. Vaccine Sensitive Disorders

5yr Avg National North London South Midlands And East

Measles (ICD10: B05)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Mumps (ICD10: B26)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Rubella (ICD10: B06)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Whooping Cough (ICD10: A37)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

5. Skin Contagions

Bullous Dermatoses (ICD10: L10-L14)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Chickenpox (ICD10: B01)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

5. Skin Contagions (Continued)

■ 5yr Avg
 ■ National
 ■ North
 ■ London
 ■ South
 ■ Midlands And East

Herpes Simplex (ICD10: B00)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Herpes Zoster (ICD10: B02)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Infections of Skin & Subcutaneous Tissue (ICD10: L00-L08)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Scabies (ICD10: B86)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Symptoms involving Skin & Oth Integument Tiss (ICD10: R20-R23)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Impetigo (ICD10: L01)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

6. Disorders Affecting the Nervous System

5yr Avg National North London South Midlands And East

Disorders of The Peripheral Nervous System (ICD10: G50-G64,G70-G72)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Meningitis/Encephalitis(ICD10: A170-A171,A390,A38-A85,A87,G00-G05)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

Symptoms Involving Nervous & Musculoskeletal (ICD10: R25-R29)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

7. Genitourinary System Disorders

Urinary Tract Infection/Cystitis (ICD10: N30,N390)
Weekly incidence (per 100,000 all ages) by region for 2024 compared with 5 year average

8. Other Disorders

■ 5yr Avg
 ■ National
 ■ North
 ■ London
 ■ South
 ■ Midlands And East

Strep Sore Throat, Scarlatina and Peritonsillar Abscess (ICD10: A38,J020,J36)
 Weekly incidence (per 100,000 all ages) by region
 for 2024 compared with 5 year average

Infectious Mononucleosis (ICD10: B27)
 Weekly incidence (per 100,000 all ages) by region
 for 2024 compared with 5 year average

8. Tabular Summary by Disease

Disease Name	Week beginning Week ending		26/08/2024 01/09/2024		19/08/2024 25/08/2024		12/08/2024 18/08/2024		05/08/2024 11/08/2024

FURTHER INFORMATION:

About the report

Focus

The first two pages of data within this report focus on influenza-like illness and virology data, in order to provide information about seasonal influenza and early warnings of any epidemic.

Rate calculation

Each weekly incidence rate is presented per 100,000 population. All presentations are for males and females, and for all age bands, unless otherwise stated.

The denominator used for this report is taken from our most recent extract of data from GP practice systems, and includes all patients currently registered with eligible practices. The denominator varies week-on-week as patients register and deregister; it may also be the case that all patients from an individual practice are excluded because of problems with the data extraction from that practice in a specific week. As stated above, patients who have withheld consent for data-sharing are excluded.

In addition to the national rate, we present data for the four NHS England regions: North; Midlands and East; South; and London.

Five-year averages

Weekly rates are set against a five-year average (navy blue lines), previously we reported against a ten-year average. The change to a five-year average was made because longer-term trends in the incidence of disease have led to weekly rates for certain diseases becoming increasingly divergent from their ten-year average. The use of five-year averages lessens this effect and enables more meaningful comparison.

Threshold calculation for influenza-like illness (ILI)

We are now using the Moving Epidemic Method (MEM) to calculate threshold and intensity levels for influenza-like illness (Graph A, page 2 and Table E, page 4 of this report). MEM works by identifying seasonal epidemic peaks and then calculates thresholds and intensity levels based on the pre and post epidemic values. This allows us to report the severity of ILI against multiple thresholds, rather than a simple comparison with the five-year average as the wide variation in ILI year on year, especially during the seasonal peak, makes the average less representative.

In addition to the All Ages thresholds, we have also calculated thresholds for four age bands: those aged 1-4, 5-14, 15-64 and those aged 65 and over. ILI incidence rates vary among different age bands, and the age-specific thresholds allow us to highlight epidemics where ILI disproportionately affects a particular age band.

This methodology is used by the European Centre for Disease Prevention and Control to standardise reporting of influenza activity across Europe, and is also in use by the UK Health Security Agency. Full details of the methodology can be found in: Vega *et al.* (2012) *Influenza surveillance in Europe: establishing epidemic thresholds by the moving epidemic method. Influenza and Other Respiratory Viruses* 7(4), 546–558.

Both the *all-ages* thresholds and the *age-specific* thresholds are shown in Table E, page 4. Five years of data were used for *all-ages* and *age-specific* thresholds calculation (winter seasons 2015/16, 2016/17, 2017/18, 2018/19 and 2022/23, excluding 2019/20, 2020/21 and 2021/22).

About the Royal College of General Practitioners (RCGP) Research and Surveillance Centre (RSC)

Acknowledgement:

Staff from the Data Science department at the National Physical Laboratory (<https://www.npl.co.uk/data-science>) assisted in the provision of and extension of the primary care national surveillance reports during the 2020 SARS-CoV-2 pandemic; as well as adding resilience.

What we do

The RCGP RSC was established in 1957, with the current name in use since 2009. The Centre is an internationally renowned source of information, analysis and interpretation concerning the onset, patterns, prevalence and trends over time of morbidity in primary care. The RSC is an active research and surveillance unit that collects and monitors data; its most important research is the surveillance of influenza and the monitoring of vaccine effectiveness.

The RSC data and analytics hub is housed at the Oxford-Royal College of General Practitioners Research and Surveillance Centre.

Further information about the RSC can be found on our website:

<http://www.rcgp.org.uk/rsc>

Our data extraction process and information governance

Data are extracted twice weekly from practice systems by Magentus data management and EMIS-X Analytics (EXA) on the RCGP's behalf. Patients who have withheld consent for data sharing are excluded from the extraction process.

Data are pseudonymised as close to source as possible. Data are held on secure servers at the RCGP data and analytics hub at the Oxford-Royal College of General Practitioners Research and Surveillance Centre. Both Magentus data management and the University of Oxford are Registered and compliant with the Data Protection Act and fully compliant with all relevant NHS Digital data information governance best practice.

What the data is used for

The RCGP RSC has been providing reports weekly about health and disease, called the Weekly Returns Service (WRS) since 1964. The WRS monitors the number of patients consulting with new episodes of illness classified by diagnosis in England and provides weekly incidence rates per 100,000 population for these new episodes of illness. It is the key primary care element of the national disease monitoring systems run by the UK Health Security Agency. The bulletin can be found at the following URL:

<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>

In addition to the WRS, the data is used for other research studies. Any other uses of the data for research follow ethical approval or agreement from NIHR proportionate review, and where relevant Health Research Authority Confidential Advisory Group advice that further approval is not needed. Full details can be found on our website:

<http://www.rcgp.org.uk/rsc>
