

DECLARATION OF INTERESTS FORM (INCLUDING CONFLICTS OF INTEREST)

Everyone who holds a position of responsibility in the College, from a Trustee to a colleague in a position as a representative or acting on behalf of the College in whatever capacity, has a duty to act in its best interests.

The College is a charity bound by its charitable objectives 'to encourage, foster and maintain the highest possible standards in general medical practice'. Competing interests are common in charities and amongst clinical practitioners who have positions in their communities and portfolio careers.

Having a competing interest or a conflict of interest does not mean you have done something wrong, however, you need to act to prevent this from interfering with your ability to decide in the best interests of the College, if applicable, or else to ensure reputational damage does not occur. This will ensure proper transparency and eliminate potential hidden bias. According to the RCGP's policy on declaration of interests, you are required to fill in this form fully and truthfully. Cases where interests are not identified, declared, or managed appropriately and effectively are referred to as "breaches" of the policy and will be investigated. If such investigations establish wrong-doing or fault then the organisation can and will consider the range of possible sanctions that are available including disciplinary action, termination of role, withdrawal of RCGP membership and/or reporting to GMC.
