Prescribing Review

Prescribing review for the trainees in the practice (Written on behalf of the WPBA group at the RCGP).

This provides a list of acute and repeat issued medication that can be reviewed. The information in the spreadsheet has come from WPBA.

The user may set a date range and a maximum amount of drugs to show in the final report.

The drugs may be searched using the Prescriber name in the issued drug or the GP that signed the drug.

You just need to enter the short name of the clinician which is shown against every entry on the patient record or you can click a button to list all the clinical staff and find out the short name.

Download

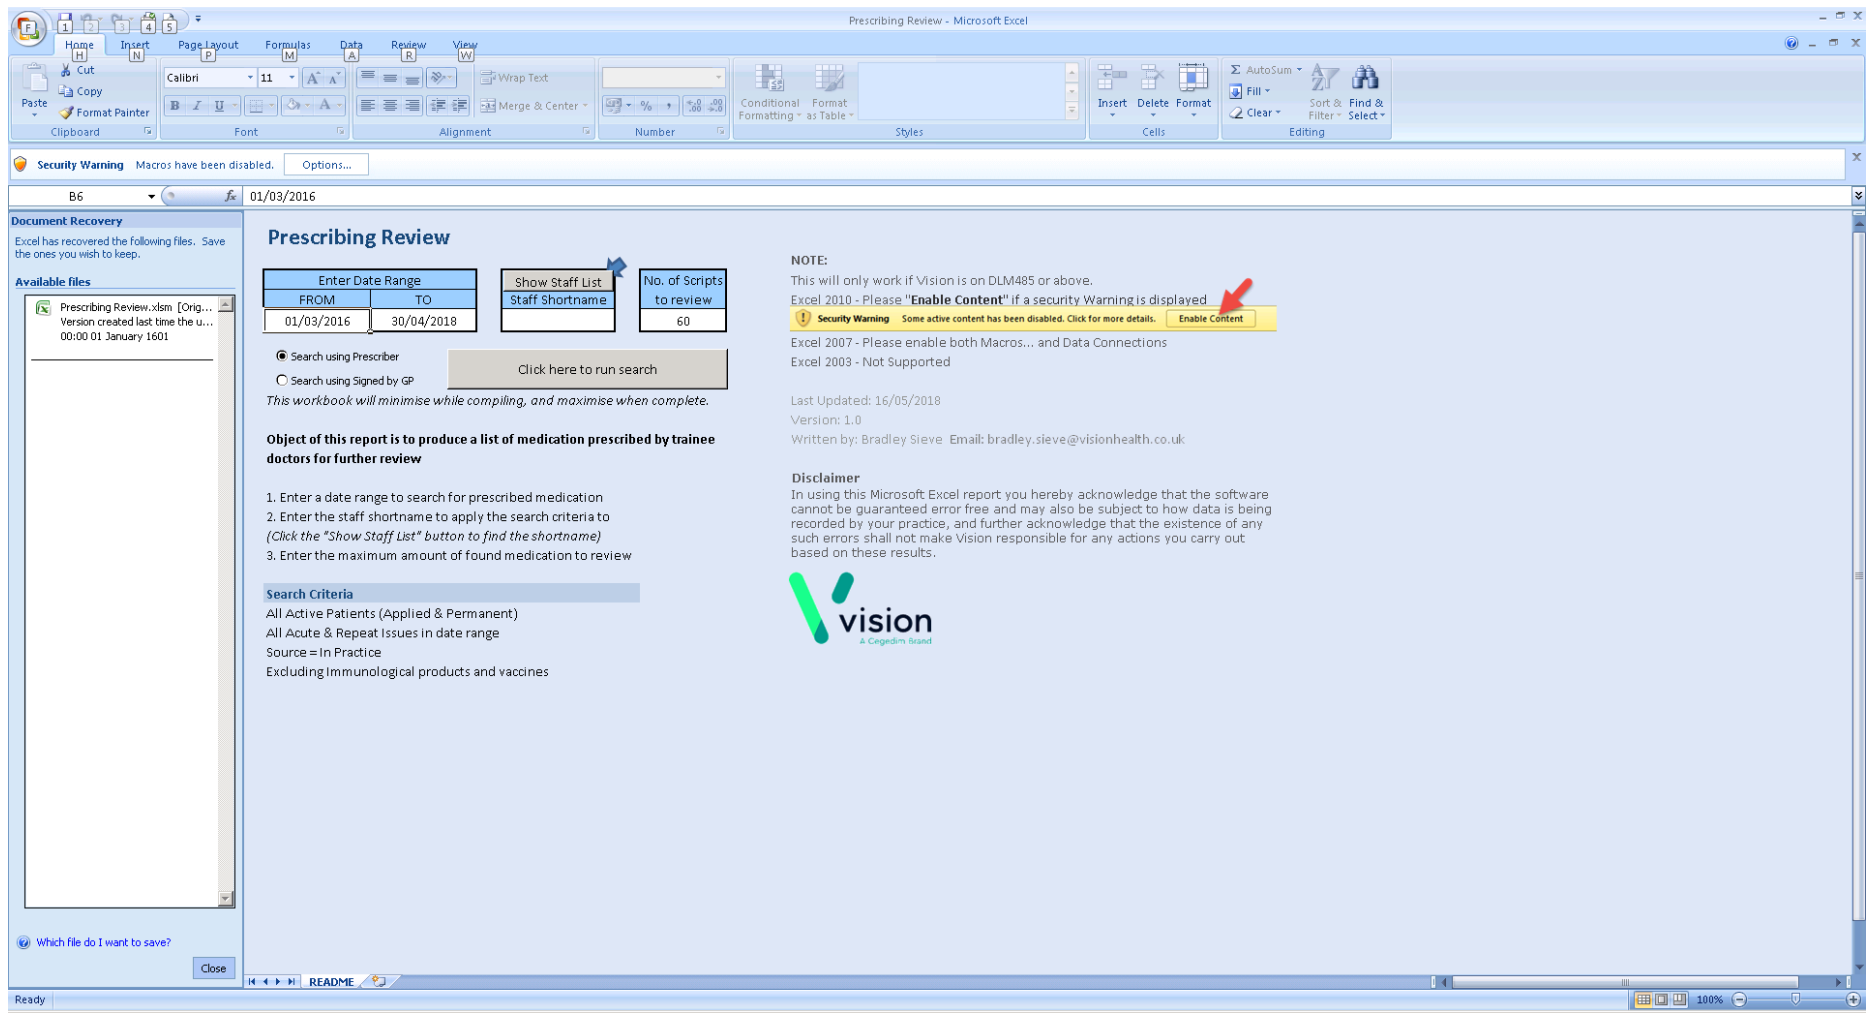

- [Prescribing_Review.xlsm](#)

Click on Download file then Click on Save and arrow up and you can change the status to Save as. This file needs to be saved in your G: or o: or P: to retrieve data from vision.

Once saved in this location double click the prescribing review to run.

The screenshot shows a Windows File Explorer window titled 'User (G:)'. The address bar shows the path 'Computer > User (G:)'. The left sidebar shows the 'Computer' section with 'User (G:)' selected. The main pane displays a list of files and folders. The file 'Prescribing Review' is highlighted in blue. The list includes various file types such as Microsoft Office documents, CFG files, and shortcuts.
